

COORDINATED CARE INITIATIVE UPDATE

In October, the Department of Health Care Services (DHCS) shared the new Cal MediConnect and Managed Long-Term Services and Supports (MLTSS) [Resource Guide](#) and [Choice Book](#).

No earlier than November 8th, DHCS will begin mailing these materials and educating eligible beneficiaries about their plan options. If beneficiaries decide not to join a Cal MediConnect plan as part of the Coordinated Care Initiative (CCI) voluntary enrollment strategy, they will be automatically enrolled into MLTSS plans.

Mailings of the new materials will be phased throughout November and December (excluding holidays) to approximately 63,000 eligible beneficiaries. They will continue as beneficiaries become newly eligible, either by having Medicare and gaining Medi-Cal eligibility or by moving into a CCI county. English materials will be mailed in November, while all other languages will be sent out in December.

Data Projections:

County	November Mailings	December Mailings	Total
Los Angeles	22000	17000	39000
Riverside	4200	1700	5900
San Bernardino	3900	1600	5500
San Diego	6300	2900	9200
Santa Clara	2200	1300	3500
			63100

The new MLTSS materials have gone through feedback from stakeholders, the Centers for Medicare & Medicaid Services (CMS), and the University of California's beneficiary user testing process. [Click here to learn more about these materials.](#)

Any questions or comments can be sent to info@calduals.org.

Thank you for your continued support of the CCI.

Sincerely,

Sarah Brooks
Deputy Director, Health Care Delivery Systems
Department of Health Care Services
