

# Policies and Procedures Manual for Health Information Privacy

## ORDER FORM for ADHC Providers

On September 23, 2013, all ADHCs must come into compliance with the "HIPAA Omnibus Rule" which implements changes required by the HITECH Act of 2009. Failure to have internal guidelines in place that comply with the new Rule can lead to fines and other sanctions.

CAADS has worked with Allan Jergesen of Hanson, Bridgett to produce a HIPAA Compliance Kit to help you quickly come into compliance with new HIPAA rules. The manual also includes updates required by changes in California confidentiality rules. **This electronic Manual includes an overview of the HIPAA rules, model policies and procedures, a comprehensive list of federal and applicable California laws and electronic templates for required agreements and notices that you may adapt for your own use.**

The price is a **terrific bargain** compared to what you would pay for even one hour of legal advice.

By purchasing the manual you agree to use it only within your own organization and not share with others.

**Order now! Please allow 2 business days for electronic delivery of your file.**
