

Just the Facts: Adult Day Health Care (CBAS)

CBAS serves adults 18-100+ with chronic health conditions in a safe and caring day center setting, to support their ability to live in the community and out of institutional care.

We are an interdisciplinary team of nurses, social workers, dieticians, occupational, physical, and speech therapists integrating health and human services inside and outside of our center walls.

In the state of **California** there are **276** centers
27 counties out of **58**

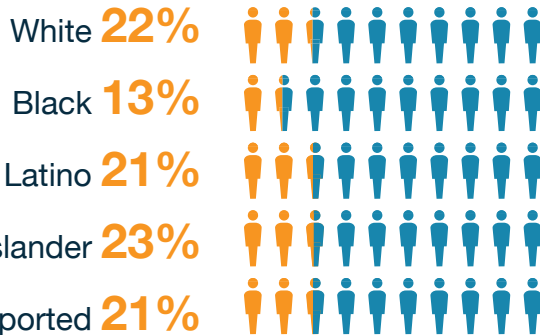

41,763
People served

Each day, centers
serve on average
34,802 participants
