This presentation will cover basic information about D-SNPs, including their structure, unique features, benefits and risks, and their interaction with Medi-Cal managed care and CBAS. [2.5 CE Hours: BRN, CAMFT, CCLD] [ADHC, ADP]

Albert Hasson, MSW, (retired) Project Director and Trainer, Pacific Southwest Addiction Technology Transfer Center, UCLA Integrated Substance Abuse Program

Working within adult day services can be rewarding, and at the same time, incredibly challenging. Through the course of our daily efforts, we develop close relationships with our participants. This is the natural consequence of our providing a caring, safe, familiar, and nurturing environment. Our participants may come to value us as friends rather than as care professional. In doing so, may want something more from the relationship than is professionally and ethically responsible. This session will define personal and professional boundaries, help us understand their value, and give us an opportunity to respond thoughtfully to situations that may push the limits of maintaining that professional relationship. Join us for an interactive session that is sure to prompt discussion within your team!
